

CLAIMS

We Claim:

1. A product comprising:
a package containing at least one disposable article;
the package comprising a top, a bottom, and a non-circular sidewall; and
means for adapting the package to either fit into or be attached to a cup holder.
2. The product according to claim 1 wherein the means for adapting comprises a fifth panel.
3. The product according to claim 1 comprising a dispensing opening located in the top and wherein the means for adapting comprises an adaptor aperture located in the bottom.
4. The product of claim 2 or 3 wherein the package comprises a carton and the disposable article comprises tissue.
5. The product of claim 2 or 3 wherein the disposable article comprises a plurality of wet wipes.
6. The product of claim 2 or 3 wherein the sidewall comprises four generally rectangular panels that intersect at approximately 90 degree angles.
7. The product of claim 2 comprising an adaptor aperture located in the fifth panel.
8. The product of claim 3 comprising a barrier layer disposed between the adaptor aperture and the disposable article.
9. The product of claim 3 or 7 wherein the adaptor aperture is formed by removing an adaptor cover.
10. The product of claim 3 or 7 wherein the adaptor aperture is formed by tearing open a perforated line.
11. The product of claim 3 or 7 wherein the adaptor aperture comprises a plurality of fingers projecting into the aperture.
12. The product of claim 8, 9, 10, or 11 comprising a beverage container inserted into the adaptor aperture.
13. The product of claim 2 wherein the fifth panel comprises a slot and an adaptor member inserted into the slot.

14. The product of claim 13 wherein the adaptor member comprises a circular body and a circular flange.
15. The product of claim 13 wherein the adaptor member comprises a circular body and a pair of tabs.
16. The product of claim 2 wherein the fifth panel comprises an adaptor member.
17. The product of claim 16 wherein the adaptor member comprises a pair of opposing adaptor sidewalls, which can be formed into a circular body, and the adaptor member is connected to the fifth panel by a living hinge.
18. The product of claim 17 wherein the adaptor member comprises a V-shaped pocket, which can be opened into a circular shape, the adaptor member when opened having a saddle-shaped bottom, and the adaptor member is connected to the fifth panel by a living hinge.
19. The product of claim 2 wherein the fifth panel is attached to the bottom.
20. A kit comprising:
 - a package containing at least one disposable article;
 - the package having a top, a bottom, a dispensing opening, and a non-circular sidewall;
 - and
 - an adaptor member either attached to the package or attachable to the package for adapting the package to be inserted into a cup holder.
21. The kit of claim 20 wherein the package comprises an upright facial tissue carton.
